

04. Working with PowerShell Providers and PS Drives

Aim

To understand PowerShell providers and navigate different data stores using PS drives.

List Providers

```
Get-PSProvider
```

List PS Drives

```
Get-PSDrive
```

File System

```
Set-Location C:\  
Get-ChildItem
```

Environment Provider

```
Set-Location Env:  
Get-ChildItem  
Get-Item Env:Path  
Set-Location C:\
```

Registry Provider

```
Get-ChildItem HKLM:\  
Get-ChildItem "HKLM:\SOFTWARE"
```

Exercise

- List all PowerShell providers.
- List all PowerShell drives.
- Display environment variables.
- Display the PATH environment variable.
- Explore the HKLM registry provider without modifying registry values.
