

08. Sample Scripts for System Administration on Azure

Aim

To use Azure PowerShell commands for basic cloud resource administration.

Install Azure PowerShell Module

```
Install-Module Az -Repository PSGallery -Force
```

Connect to Azure

```
Connect-AzAccount
```

Subscriptions

```
Get-AzSubscription
```

```
Set-AzContext -SubscriptionId "YOUR-SUBSCRIPTION-ID"
```

Resource Groups

```
Get-AzResourceGroup
```

Virtual Machines

```
Get-AzVM
```

```
Get-AzVM -ResourceGroupName "MyResourceGroup" -Name "MyVM" -Status
```

Start and Stop a VM

```
Start-AzVM -ResourceGroupName "MyResourceGroup" -Name "MyVM"
```

```
Stop-AzVM -ResourceGroupName "MyResourceGroup" -Name "MyVM"
```

Storage Accounts

```
Get-AzStorageAccount
```

Do not run start/stop commands on production resources without authorization. Use a test subscription or lab resource.
